**Mpathy Medical to Showcase Less Invasive Mesh Surgical Solutions
at American Urological Association's Annual Meeting**

Raynham, Massachusetts, May 15, 2008 - Mpathy Medical, a rapidly growing medical device company which has developed and brought to market a range of less invasive surgical solutions used to restore pelvic health to women, will showcase its new, ultra lightweight mesh products at the American Urological Association's (AUA) Annual Meeting taking place May 17-22, 2008 in Orlando, FL.

"We are excited to exhibit our new mesh products at the AUA's Annual Meeting," stated Ian Stevens, Chief Executive Officer, Mpathy Medical. "Our Minitape® solution is the first minisling procedure used to treat female urinary stress incontinence that can deliver the effectiveness of a full length sling and has the ability to be adjusted up to 72 hours postoperatively."

Mpathy Medical's core product lines - Minitape® and Restorelle™ - are constructed with the patent protected surgical mesh called Smartmesh™, which is a physiologically compatible, ultra lightweight polypropylene mesh that encourages superior collagen growth for the patient. Minitape® is the original patented minisling which treats women experiencing urinary incontinence issues. As the only minisling which delivers the efficacy and features a full length sling via a less invasive procedure that leaves less mesh in the body, Minitape® delivers optimal outcomes for urologists and their patients. The Restorelle™ product line treats all types of pelvic organ prolapse.

"Urinary stress incontinence and pelvic floor repair should aim to achieve the best clinical results and minimize foreign body complications," stated Red Alinsod, M.D., Laguna Beach, CA. "Mpathy Medical's line of products

provide us with the ability to attain positive surgical outcomes while maintaining the best possible quality of life for the patient. In our series of over 200 patients, we have had no vaginal erosions.”

Mpathy Medical encourages AUA attendees to stop by its booth - #3944 - to learn more about Mpathy Medical and its products. Attendees will:

- See Mpathy Medical’s new surgical mesh products granted 510(k) clearance and CE marking.
- Meet with representatives from the Mpathy Medical team including James Browning, M.D., Founder & Chief Technology Officer, Mpathy Medical.
- View the products used in surgery via live anatomical demonstrations and surgery videos.
- Learn the history of Mpathy Medical.

About Mpathy Medical

Mpathy Medical is a rapidly growing medical device company which has developed and brought to market a range of surgical solutions used to restore pelvic health to women. Mpathy Medical’s core product lines - Minitape® and Restorelle™ - are used by surgeons specializing in urology, urogynecology and obstetrics/gynecology to treat female urinary stress incontinence and pelvic organ prolapse. Founded in 2003 by a surgeon, Dr. James Browning, Mpathy Medical supplies the only mesh surgical solution designed specifically for the female anatomy. The mesh - branded Smartmesh™ - is a physiologically compatible, ultra lightweight polypropylene mesh which encourages superior collagen growth and works in concert with the patient’s own natural tissue for optimum safety and results. The company is headquartered in Glasgow, Scotland with US operations in Raynham, MA and has received 510(k) clearance to market by the FDA in the US and CE marking in the UK for all its medical devices.
